Overview

Cash Reserve is a project in the DeFi domain, abbreviated as Casher. It is a purposeful, secure, intelligent, and scalable project that aims to become a functional currency project after following a step-by-step development program. This project intends to start investing and participating in industries and research, scientific, and development companies after the completion of its presale and listing on exchanges. The profits from these investments will be distributed among the holders of this currency based on their share amount. In the future, this project plans to create a native platform for its transactions. Cash Reserve now significantly reduces costs and increases security using the BNB blockchain. With this project, you will enter a new and highly functional world in the DeFi domain. With Cash Reserve, you create a treasure in your wallet.

Info & Socials

Token Name	Cash Reserve
Token Symbol	CASHER
Total Supply	3,000,000,000
Presale Supply	300,000,000
 The image features a large, semi-transparent watermark of the 'Cash Reserve' logo in the center. The logo consists of a stylized 'C' shape on the left, followed by the text 'ash Reserve' in a serif font, and a large 'R' on the right. Below the 'R' is the word 'Links'.

Vision & Purpose

- Establishing a deposit fund and a large liquidity pool.
- Lending and investing in international development projects and distributing profit from participation among Cash Reserve holders.
- Investment contracts, once approved by experts, will be put to a general vote among Cash Reserve shareholders.
- Creating a native payment platform with minimal transaction fees and high security to facilitate easy transactions backed by a very large liquidity pool.
- Building a bridge between traditional and digital trading worlds in an easy and secure way.
- Setting up a dedicated voting, suggestion, and feedback panel to provide solutions and opinions for Cash Reserve shareholders.
- Preventing inflation on the Cash Reserve platform through a balance between supply and demand and focusing on presence in conventional and international markets.
- Cash Reserve shareholders can share innovative ideas with our experts by submitting them via email. If these ideas are reviewed, approved, and receive the necessary vote from the shareholders, the ideas will be implemented using Cash Reserve capital.

Tokenomics

- **10%** of the total tokens will be offered for presale, representing a significant share in the Cash Reserve ecosystem. Naturally, this will be the cheapest price to start investing. As early buyers, you will have full voting rights and influence over the future direction of Cash Reserve.
- **5%** of the total tokens will be allocated as rewards to loyal and long-term shareholders, providing them with the opportunity to earn passive income.
- **5%** for advertising campaigns, global marketing, influencers, and famous individuals who collaborate with and promote us.
- **20%** of the three billion tokens produced will be allocated to the developers. This is primarily aimed at preventing severe fluctuations, inflation, and ensuring the continued development of Cash Reserve in the future.
- **20%** will be allocated for lending to international knowledge-based industries and companies, contingent upon our experts' approval as investments in their projects. The profits generated from these investments will then be distributed among the extensive community of Cash Reserve holders through the growth of financial value, thereby creating stability and backing for it.
- The remaining **40%** of the tokens will be allocated for development on exchanges, listing, and market offering in a controlled and gradual manner. This is to protect the interests of the Cash Reserve community, based on the insights of our economic experts and planners. It will be implemented over time according to the guidance of specialized experts.

Roadmap

Step One: Start the Presale

- To establish a minimum initial liquidity pool, increase the number of shareholders, and introduce Cash Reserve.

Step Two: Establish and Launch a Bridge

- Create and launch a secure and fast bridge between the BCS blockchain and Cash Reserve, ensuring compatibility and seamless transfer of assets.
- Launch the Cash Reserve-related DEX.
- Collaborate with influencers and individuals who can promote Cash Reserve.

Step Three: Listing on Major Exchanges

- After completing the previous three steps, Cash Reserve will be listed on major exchanges worldwide.

Step Four: Native Ecosystem

- Begin developing a secure, fast, and scalable native ecosystem and a dedicated exchange gateway.
- Collaborate with research, investment companies, and research organizations.

Conclusion

- With its significant and achievable goals, Cash Reserve is an excellent option for investing and profiting in the cryptocurrency market.
- This project aims to build a bridge between traditional exchanges in industries like research centers and academia with the digital trading world, enhancing the practical utility of the project.
- Cash Reserve is strongly anti-inflationary. Cash Reserve is highly committed to its goals.
